## Expériences professionnelles

### AIRBUS

**2024/2026 (2 years) :** Work-study technician in System/Network Telecommunications in **AIRBUS Defense and Space**

Responsibilities:

- Assisted in maintaining network and telecommunications equipment
- Contributed to resolving network tickets and incidents
- Implemented efficient solutions to troubleshoot and resolve client needs quickly
- Collaborated with teams to ensure the good management of incidents.

I'm a motivated Networks and Telecommunications student with practical experience in network administration and cybersecurity through my work-study at Airbus Defense and Space. I've developed strong problem-solving skills through real-world scenarios and SAEs (professional simulations). I thrive in dynamic environments and aim to apply my expertise to innovative projects while continuing to grow professionally.
